Track or Sample

Arduino Sample & Hold wishlist  
KLAR Internal rnd 1023  
HOLD IN Trig in + LED on that.  
KLAR Peak LED  
Sample signal in  
KLAR Min value pot map value to this value as min  
KLAR Max value pot map value to this value as max map(value,0,1023,minvalue,maxvalue);  
KLAR Output 10 pins 0-9  
KLAR Switch s&H track & hold?  
Track and hold will output the signal all the time and hold it when triggered.

Kan skippa hela -12v delen?
